PROFESSIONAL EXPERIENCE

Digital Project Manager — *Groupama, Paris* Oct. 2025 – Sept. 2026

- Led digital and data transformation projects with the business units (health, mobility, HR, marketing): needs framing, roadmap and delivery.
- Generative AI enablement: a 90-minute workshop designed and delivered single-handedly to the 8 teams of the digital division and their managers, with 10 costed use cases.
- Interface between business and technical teams (UX/UI, product owner, developers, data teams), external agencies and the 11 regional mutuals: workshop facilitation and stakeholder coordination, from framing to rollout.
- User journey and behaviour analysis with Adobe Analytics: friction point identification, anomaly detection and data-driven recommendations.
- Design and management of A/B tests (Adobe Target, Contentsquare): hypothesis setting, performance measurement and optimisation of conversion and engagement rates.

Marketing and Sales Consultant — *Green Seed France, Paris* Nov. 2022 – Oct. 2024

- Marketing and sales consultancy supporting international food and beverage brands on the French market: end-to-end management of client projects.
- Market research and data analysis (Nielsen, Kantar, store checks): segmentation, competitive analysis and strategic market-entry recommendations.
- Design of dashboards and KPI reporting to track performance and support decision-making.
- International LinkedIn project: rollout of a content strategy and coordination of the group's 11 offices, with a measured rise in followers and impressions.
- Management of 2 B2B client portfolios: development, retention and negotiation.

Digital Marketing Officer — *NJ Création, Paris* Feb. 2021 – Dec. 2021

- Management of the e-commerce site (PrestaShop) alongside the developers: customer journey optimisation through behavioural data analysis, bug fixing and feature additions.
- Tracking and analysis of KPIs (website and social media) to improve engagement and conversion; analytical reporting and data-driven recommendations.
- Process automation (product catalogue management) to improve efficiency.
